## **FOREWORD**

Dairy Development Authority is a statutory body under Ministry of Agriculture, Animal Industry and Fisheries. For the Authority to constantly track the implementation of its development agenda and realize its Vision of having an “Improved Health and Prosperity of Ugandans”, quality statistics constitute part of the enabling environment for measuring progress, input requirements, outputs, outcomes and the impact of various strategic interventions.

Dairy Development Authority is committed to provide effective service delivery which requires reliable, complete and timely statistics for evidence-based planning. The Statistical abstract 2021/22 covers the key indicators of the dairy sector in Uganda. This publication has been compiled using data obtained from the Authority, Uganda Bureau of Statistics (UBOS), and Uganda Revenue Authority (URA) among others. It covers compilations of relevant data variables for the FY 2021/2022.

DDA appreciates other Government Ministries and Agencies especially UBOS and URA for the support rendered during the compilation of this Statistical Abstract. Appreciation also goes to the Members of the Authority’s Statistical Committee, DDA Staff and the Planning Unit for their efforts towards this publication. Special thanks to Ms Doreen Asiiimwe the Data Officer and Mr Kenneth Otikal, the Technical Chairperson of the Committee for his strategic guidance towards this publication.

It is my pleasure to present to you the first DDA Statistical Abstract.

**AG.EXECUTIVE DIRECTOR**

## **EXECUTIVE SUMMARY**

Dairy Development Authority (DDA) is a statutory body under the Ministry of Agriculture, Animal Industry and Fisheries (MAAIF). It was established by the Dairy Industry Act, 1998 with a mandate to develop and regulate the dairy industry in Uganda. The Act under section 5 of the Dairy Industry Act 1998 mandates the Authority among others to;

1. Register and license milk processors and traders;
2. Support dairy farmers' marketing Organizations
3. Advise the government on milk standards
4. Coordinates all dairy processing and marketing promotional activities
5. Controls and regulates dairy and dairy related import and export activities.
6. Pool dairy processing and marketing data;
7. Advise the Government on research priorities of the dairy sub sector and

The Act provides for routine data production of milk processors and traders, production, productivity, export, import, pricing and consumption statistics. It directs the generation, management, analysis and dissemination of data along the entire value chain.

Due to the continued demand for dairy statistics, DDA has redefined its statistical development agenda to address data needs from it's relevenat stakeholders. The Authority developed its Strategic Plan for Statistics and a statistical abstract is one of the strategic outputs in the plan geared to disseminating the dairy statistics. This Statistical Abstract is the first publication of its kind from the Authority and gives a statistical summary and compedium of dairy industry data for the country.

## CHAPTER ONE

### 1.0 Introduction

Statistical data is very important both for planning and decision making in the Authority. Due to the growing needs of statistics relating to the dairy sector, the Authority has been able to publish its first Edition of the Statistical Abstract. The Authority in collaboration with Uganda Bureau of Statistics (UBOS) has managed to support the collection, compilation, analysis and production of this 2021/22 Statistical Abstract. The Authority is implementing its Strategic plan for Statistics and part of the publications required as stated in the Third Plan for Statistical Development (PNSD III) is the Annual Statistical abstract.

### 1.1 The mandate

To develop and regulate the dairy sector in Uganda

### 1.2 Authority Vision

Dairy for improved health and prosperity of Ugandans

### 1.3 Authority mission

Increased productivity and competitiveness of the dairy sector and enhancing its contribution to population health and wealth of all Ugandans.

### 1.4 Key performance strategic areas

- ❖ Dairy production and productivity
- ❖ Post- harvest handling
- ❖ Dairy value addition and market competitiveness
- ❖ Quality Assurance and domestic dairy consumption promotion
- ❖ Dairy Institutional Strengthening.

### 1.5 Governance and Organization structure of DDA

The Authority is governed by the Board of Governors. The Executive Director is the Chief Executive Officer of the Authority. The Authority has 95 Staff members .In absence of the Board; the Minister of State for Animal Industry assumes overall management of the Authority.

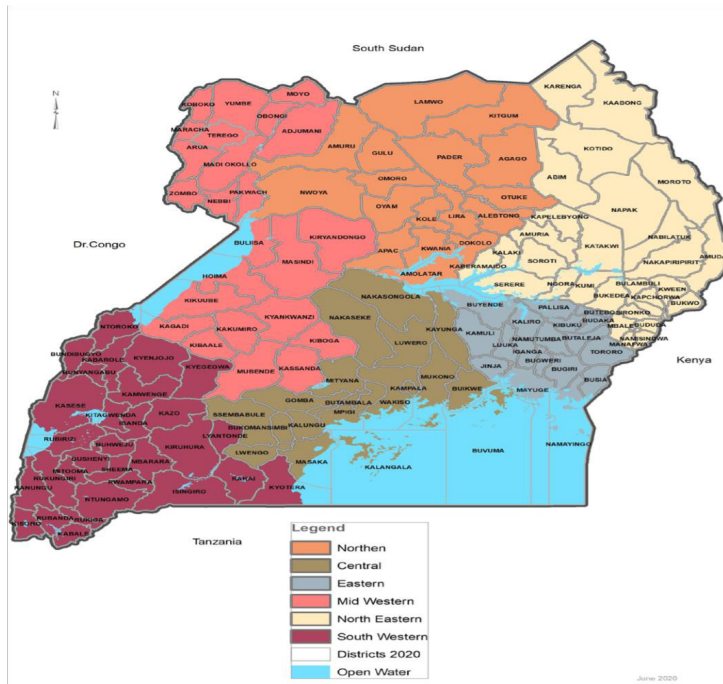

## 1.6 The process of developing the Statistical Abstract

This is the first edition of DDA's statistical Abstract and its success is due to a contribution from several players from the planning Unit, the DDA Statistical committee and the entire Authority Staff. A number of consultations were made including seeking guidance from UBOS which supported effectively.

## 1.7 Dairy Milk Sheds in Uganda and their Offices

The Authority is divided into six (6) Milk sheds namely; Central, Southwestern, Northern, Northeastern, Midwest and Eastern milk sheds.

### DDA Milk Sheds

Source: DDA

Central milk shed covers areas of Buganda and the offices are in Kampala at DDA head office. Southwestern milk shed covers areas of Ankole, Kigezi, Rukiga and Rwenzori sub regions. The Offices are in Mbarara City. Northern milk shed covers areas of Acholi and Lango sub regions. The Offices are in Gulu city. Northeastern milk shed covers areas of Bugisu, Teso, Sebei, Karamoja sub regions. The offices are in Soroti City. Midwestern Milk shed covers areas of Bunyoro and parts of Buganda. Offices are in Kiboga district. Eastern milk shed covers areas of Busoga, Bukedi, parts of Elgon sub regions. Regional Offices are at the DDA head office.

## CHAPTER TWO

### 2.0 Dairy Input Suppliers

Dairy inputs include feeds, farm machinery, labor etc. Other Critical inputs are animal health service providers who are both government and private. It is estimated that 1,600 extension workers, 1922 veterinary drug shops (NDA report, 2021) and 815 trained nucleus farmers provide animal health and extension services to dairy farmers. Fourteen (14) artisans, manufacturers and distributors provide farm machinery and equipment for dairy farmers.

Currently there are 470 veterinary registered products and 1 herbal veterinary product (NDA, 2022)

**Table 1: Input service provided by location, product ranges and category**

<i>Category</i>	<i>Description</i>	<i>Number</i>	<i>Products tonnage</i>	<i>Location/Milk shed</i>
<b>Feeds manufacturers and distributors</b>	Formal Informal	51 2,000	70,000 tons 40,000 tons Pasture seeds	Central
<b>Water and related infrastructure service providers</b>	Government Private well constructors	Government 03 Private-formal -03 Private-informal 700	Dams, Valley tanks, shallow wells, Water equipment.	Country wide
<b>Veterinary and Animal Health service providers</b>	Extension workers Veterinary drugs shops Veterinary pharmacies, drug manufacturers /distributors Model/nucleus farmers	1,600 1,022 93 15 815	Advisory services Drugs and Residues Treatments AI	Countrywide
<b>Breeders</b>	Government Community Breeder Associations Informal breeders	01 03 15	Improved breeds	Central South West
<b>Farm machinery and equipment</b>	Local artisans/fabricators Importers and distributors of equipment's etc.) Government institutions	4 10 8	Chuff cutters, milk cans, milking machines, tractors, hay bailers	Central
<b>Farm Labor</b>	Prisoners Informal local labor (Youth, Women & Men etc.) Household labor	25,000 1.5 million 22 million	Farm working hours	Countrywide

## 2.2 Herd Size

The herd size, specifically its composition in terms of the type of breed has a direct relationship with the milk volumes and animal productivity. The various types of breeds kept are the local breeds (Ankole long horned cattle and Zebu), Jersey, Guernsey, Friesian and Cross breeds, with the local breeds being predominant. The herd size in Uganda has increased over the last seven years and reached 14.8 million in 2019 implying an increase of 13.6% from 2015.

**Table 2: National herd size trend from 2013 to 2019**

Year	2013	2014	2015	2016	2017	2018	2019
<b>Herd</b>							
<b>Size</b>	13,020,000	13,623,000	14,204,948	14,368,000	14,189,000	14,572,103	14,784,856

*Source: MAAIF and UBOS reports*

## 2.3 Milk Production

Milk production is a key component of the dairy value chain because it's a key indicator in measuring the dairy industry growth and has an effect on exports and per capita consumption. Milk production has tremendously increased over the years from 2.51Billion liters in 2018 to 3.2Billion liters in 2022.

**Table 3: Trend of Milk production in Uganda**

Year	Milk Production(Billion liters)
2018	2.51
2019	2.52
2020	2.6
2021	2.81
2022	3.2

*Source: DDA Annual reports*

## 2.4 Milk productivity and production by region

Milk productivity as measured by the daily milk production per cow has a direct relationship with the national milk production volumes. The national average milk productivity is 4.8 liters. Central region has the highest average milk productivity per cow (6.3 liters) while Karamoja region has the lowest (2.1 liters). Western region contributes 32.7 percent of the total milk produced in the country followed by central (30.6 percent).

**Table 4: Average milk productivity per cow per region**

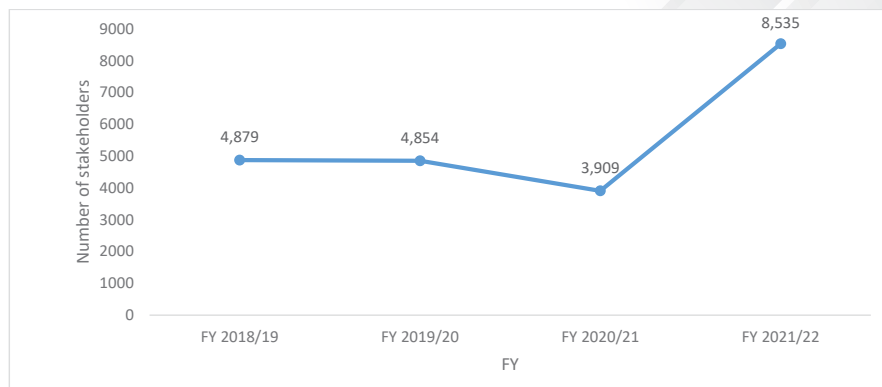

<b>Region</b>	<b>Averagedaily productivity/cow</b>	<b>Milk Milk Production(Liters)</b>
Central	6.3	982,076,584
Eastern	4.8	606,938,323
Northern	4.6	296,009,384
Western	6.2	1,047,562,639
Karamoja	2.1	275,218,944
<b>Total</b>	<b>4.8</b>	<b>3,207,805,874</b>

*Source: DDA annual report*

## 2.5 Dairy stakeholders trained and skilled in FY 2018/19-2021/22

Training and skilling dairy stakeholders are important components of the dairy value chain in increasing productivity and quality of milk and milk products. The skilling and training is usually on clean milk production and handling practices, feed production and conservation, and value addition among others. There was an increase of approximately 75% in the number of dairy stakeholders trained in the FY 2021/22 from FY 2018/19. The greatest increase was noted between 2020/21 and 2021/22 (118.3%)

**Figure 1: Trend of Trained Dairy Stakeholders over the four years**

*Source: DDA annual reports*

## 2.6 Farmer groups/Cooperatives supported with farm inputs

DDA supports farmers with farm inputs such as pasture seeds, milk cans, chuff cutters, milking buckets for demonstration purposes. A total of 37 Farmer groups/Cooperatives were supported with farm inputs.

**Table 5: Farmer groups/Cooperatives supported with inputs by Milk shed**

Milk shed	Number of farmer groups/Cooperatives
Eastern	19
Central	03
Southwest	00
Northern	01
Northeast	02
Midwest	12
<b>Total</b>	<b>37</b>

## CHAPTER THREE

### 3.0 Milk Collection, Storage and Bulking

Milk storage and bulking is an important component of the dairy value chain. Bulking and storage promotes quality and increases access to market. Raw milk is collected from the farms and stored at Milk Collection Centers and Bulking centers for preservation and marketing.

#### 3.1 Milk Collection Centers by milk shed

There are 547 registered Milk Collection Centers (MCCs) in the country distributed throughout the different regions. MCCs collect and store milk for distribution to the processors and milk sales point. Southwestern milk shed has the highest number of Milk collection centers (59.8 percent) followed by the Central milk shed (19.0 percent) while the Northern milk shed has the least number of Milk Collection centers (2.4 percent)

**Table 6: Distribution of registered MCCs by milk shed**

Milk shed	Number of MCCs	Percentage
Southwest	327	59.8
Central	104	19.0
Midwest	48	8.8
Northeast	33	6.0
Eastern	22	4.0
Northern	13	2.4
<b>Total</b>	<b>547</b>	<b>100</b>

#### 3.2 Distribution of Milk Bulking centers by milk shed

Raw milk is collected at Milk Collection Centers which are later bulked at Bulking centers with a higher storage capacity than the MCCs. There are 12 bulking centers across the country with a total capacity of 266,560 liters. Approximately 66.6 percent of the Bulking centers are situated in the Southwestern milk shed.

**Table 7: Distribution of Bulking Centers across the country**

<b>Milk shed</b>	<b>Number of BCC</b>	<b>Total Bulking capacity (Liters)</b>
Midwest	2	60,000
Southwest	8	166,560
Central	2	40,000
<b>Total</b>	<b>12</b>	<b>266,560</b>

### 3.3 Milk Coolers and installed capacity

Milk cooler capacity is important in determining how much can be stored based on the total daily production. Milk Collection Centers have coolers with different installed capacities in terms of liters. Milk coolers have increased over time from 355 with a capacity of 1.5million liters in 2016 to 645 in 2022 with a capacity of 2.08 million liters.

South Western milk shed has highest number of coolers (405) with capacity of 1.3million liters followed by central (122) with capacity of 0.4million liters. Northern milk shed has the least in terms of coolers and capacity.

**Table 8: Distribution of Milk Coolers by capacity per milk shed**

<b>Milk shed</b>	<b>Number of Coolers</b>	<b>Installed Capacity(Liters)</b>
Central	122	442,186
Southwest	405	1,302,600
Eastern	22	63,500
Midwest	48	149,000
Northern	14	34,560
Northeast	34	92,500
<b>Total</b>	<b>645</b>	<b>2,084,346</b>

*Source: DDA*

### 3.4 Inspections at cooler and Freezer premises by milk shed

Inspection of milk handling premises is vital in ensuring adherence to quality standards for milk and dairy products. A total of 1,151 inspections on cooler premises and 1,128 on freezers were conducted across the different milk sheds during the 2021/22 FY.

Western milk shed has the highest number of inspections on coolers (38.6 percent) while central milk shed has the highest number of inspections on freezers (35.1 percent), Northern milk shed has the lowest number of inspections on both coolers and freezers i.e. 1.7percent and 5.8 percent respectively.

**Table 9: Distribution of Milk handling premises inspected per milk shed**

<b>Milk shed</b>	<b>Coolers</b>	<b>Percentage</b>	<b>Freezers</b>	<b>Percentage</b>
		<b>%</b>	<b>Number</b>	<b>%</b>
Southwest	444	38.6	108	9.6
Central	363	31.5	396	35.1
Midwest	264	22.9	159	14.1
Northeast	38	3.3	220	19.5
Northern	20	1.7	65	5.8
Eastern	22	1.9	180	16.0
<b>Total</b>	<b>1,151</b>	<b>100</b>	<b>1,128</b>	<b>100</b>

*Source: DDA*

## CHAPTER FOUR

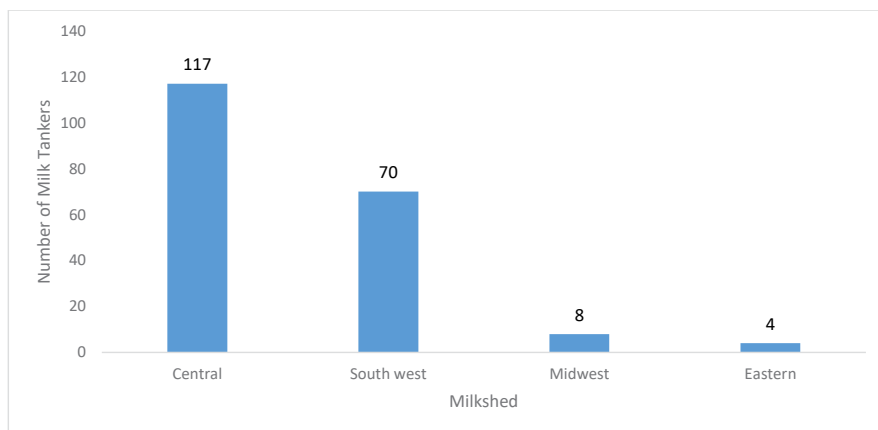

### 4.0 Milk transportation

Milk transportation is an important component of the dairy value chain because it has a bearing on the quality, processing costs and the final price to the consumer. The steady increase in milk production coupled with continuous investment in dairy milk collection/bulking and processing facilities requires more insulated milk tankers as one of the recommended means of milk transportation.

#### 4.1 Registered Road Milk Tankers by milk shed

The country has a total of 199 registered road milk tankers distributed across the four milk sheds of Central, South west, Mid-west and Eastern. Central milk shed has the highest number constituting 58.8 percent followed by south west (35.2 percent). Eastern milk shed has the lowest number (2.0 percent).

**Figure 2: Distribution of Road Milk Tankers per milk shed**

#### 4.2 Road Milk Tanker registration disaggregated by Milk shed.

Approximately 50.6% of tankers are located in the central milk shed and about 43.7% are located in the Southwestern milk shed.

**Table 10: Registered Road Milk Tankers in 2021 per milk shed.**

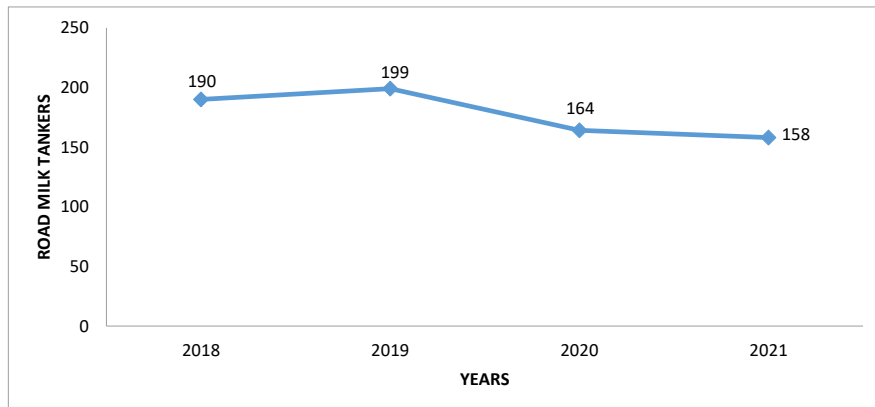

Milk shed	Number of Tankers	Percentage
Central	80	50.6
Eastern	1	0.6
Midwest	8	5.1
Southwest	69	43.7
<b>Total</b>	<b>158</b>	<b>100</b>

*Source: DDA Licence Register*

#### 4.3 Trend of Registered milk tankers overtime.

In the last 2 years, the number of registered milk tankers has been reducing. There was a 3.5% decrease in 2021 compared to 2019. The trend is as shown below;

**Figure 3: Registration of Road Milk Tankers over the last four years**

*Source: DDA Licence Register*

## CHAPTER FIVE

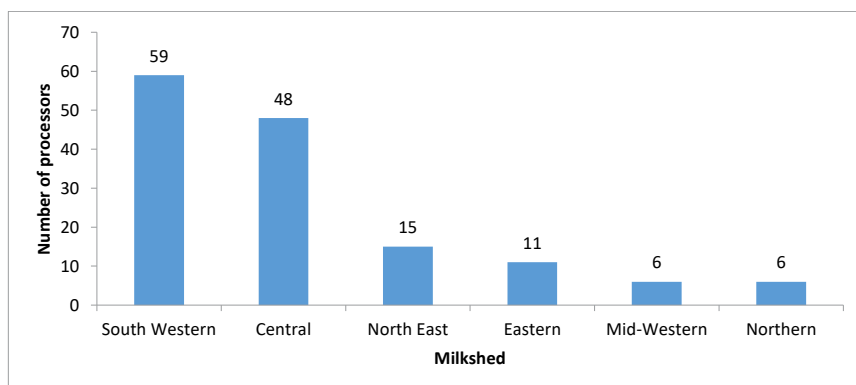

### 5.0 Dairy Processing

Milk processing is very important in promoting value addition and increasing the shelf life of milk and other dairy products. Processing also boosts export market for the dairy products. The dairy processors are disaggregated into large scale, medium scale and small scale processors.

#### 5.1 Dairy Processing Facilities disaggregated by milk shed

The Country has a total of 145 dairy processing facilities ranging from large, medium and small scale distributed across the five milk sheds.

#### Distribution of Dairy Processing Facilities Per Milk shed

Source: DDA license register

#### 5.2 Registered Dairy processing Facilities by milk shed.

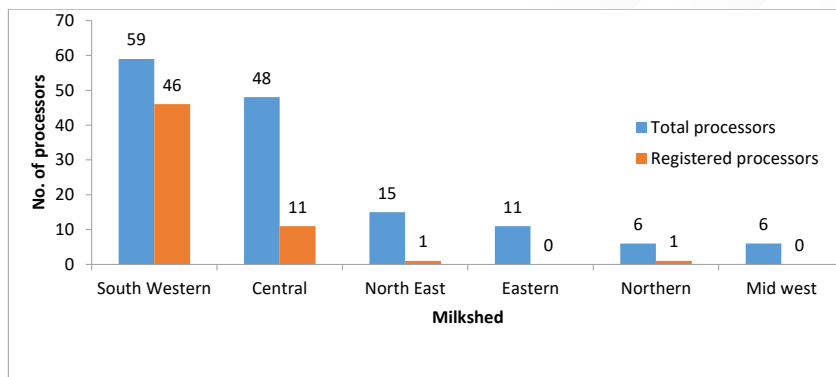

Registration of dairy processors is important to ensure that they adhere to the recommended standards and for closer supervision and inspection.

Out of the 145 dairy processors, only 59 have been registered and licensed by DDA representing 40.7 percent. Most cottages have not picked up completely and are under close supervision and guidance by the Authority Staff in different milk sheds to ensure their growth. These are in the process of acquiring the necessary requirements for registration.

South western milk shed had the highest compliance rate of 77.9 percent followed by Central with 22.9 percent. Eastern and mid-western milk shed had no licensed processors despite having processors.

### Distribution of processing Facilities by registration status per milk shed

Source: DDA license register

### 5.3 Installed and operating capacity of Processing Facilities by milk shed

Installed and operating capacity of the processors has a bearing on the growth of the industry, volume of milk that is processed and ultimately to the volumes of exports of the country.

The total national operating capacity for all processors is 3.4million liters against the installed capacity of 2.3million liters representing 68.7 percent. The Most processing plants are situated in the South western milk shed followed by the Central milk shed accounting for 62.5 percent and 37.1 percent of the installed capacity respectively.

**Table 11: Installed and operating processing capacities per milk shed**

Milk shed	Installed capacity (Liters)	Operating capacity(Liters)
Southwest	2,107,910	1,431,430
Central	1,252,470	878,240
Midwest	1,100	900
Northeast	4,665	3,360
Northern	10,900	5,350
Eastern	1,900	1,500
<b>Total</b>	<b>3,378,945</b>	<b>2,320,780</b>

## 5.4 Milk and Dairy products processed

Uganda processes a variety of dairy products which are consumed both locally and internationally. UHT milk is the most processed product accounting for 64.5 percent of the processed products followed by yoghurt (11.6 percent) and milk powder (7.1 percent).

**Table 12: Processed Dairy products**

<b>Product name</b>	<b>Production percentage</b>
Yoghurt	11.6
Milk powder	7.1
UHT long life	62.4
Pasteurized milk	6
Cheese	3.1
Ice cream	1.7
Butter	1.3
Butter oil	0.8
Ghee	2.3
Acid Casein	2.4
Vito	0.5
Whey protein	0.8

*Source: DDA reports*

## 5.3 Average ex-factory prices of Milk and Dairy products

Ex-factory price is the price of a product at the factory. Ex-factory prices differ from one processor to another and from one season to another due to the different costs of production associated with each processor. The ex-factory price is also dependent on the type of materials required to process the product.

Cheese is the most expensive product at factory level followed by casein and the lowest being UHT long life.

**Table 13: Milk and Dairy products ex-factory prices**

<b>Product name</b>	<b>Average ex-factory price(Ugx/kg)</b>
Yoghurt	4,386
Full cream Milk powder	14,369
UHT long life	2,250
Pasteurized milk	2,438
Cheese	23,711
Butter	11,478
Ghee	13,794
Casein	23,582

#### 5.4 Milk Processing Facilities inspected and Registered

There are more mushrooming cottages in the country that require constant inspection to ensure that they adhere to the required standards of quality to protect consumers. During the FY 2021/22, a total of 126 processors and cottages were inspected to ensure compliance with the dairy standards and for technical guidance.

Out of the 126 cottages inspected in the different milk sheds, central milk shed had the highest number representing 42.9(percent), followed by south western (27.8 percent). Eastern milk shed had the lowest number of cottages inspected.

**Table 14: Distribution of Processing Facilities inspected per milk shed**

<b>Milk shed</b>	<b>Number of Processors inspected</b>
Southwest	35
Central	54
Midwest	8
Northeastern	15
Northern	13
Eastern	1
<b>Total</b>	<b>126</b>

*Source: DDA Quarterly reports*

## CHAPTER SIX

### 6.0 Milk Marketing and Consumption

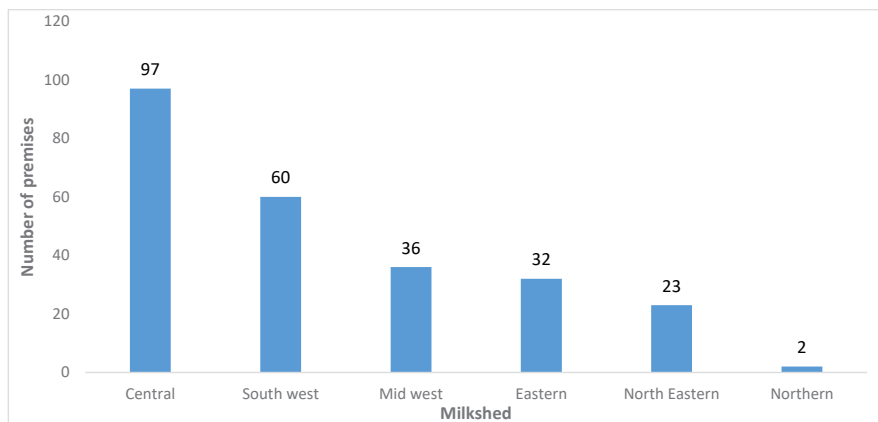

Milk is consumed and marketed in form of raw milk and processed milk products. Milk is marketed at different levels of the value chain i.e. Raw milk is sold right from the farm level, retail points and Milk Collection Centers and processed products from retailers.

The national average milk consumption per capita is 63 liters (milk consumption report, FAO) against the recommended 200 liters as per World Health Organization (WHO) standards. Most of the milk produced is consumed in raw form especially in rural areas and the greater percentage is consumed in urban areas in form of powder, UHT, Yoghurt and other products.

#### 6. Distribution of freezer premises by Milk shed

Raw milk is retailed at retail outlets to the final consumer. Some of these outlets have freezers to cool the raw milk awaiting sale. Below is a distribution of licensed freezer premises as of 2021.

**Figure 4: Freezer premises licensed in 2021 per milk shed**

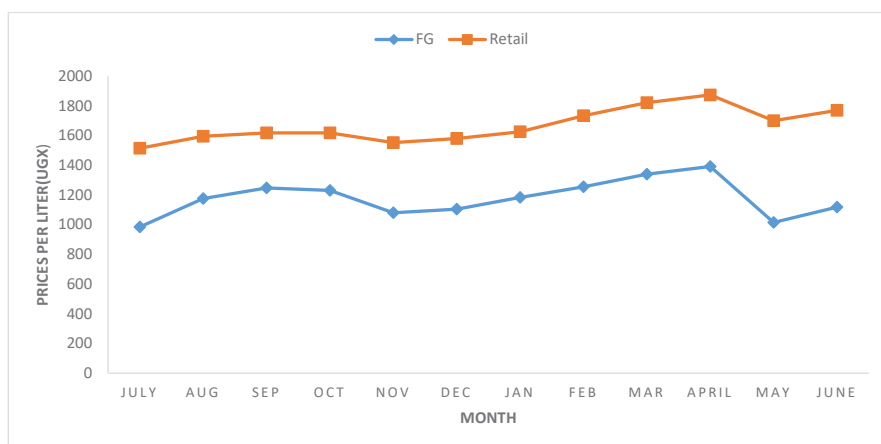

Source: DDA license register

## 6.2 Raw Milk Prices

### National Farm gate and Retail prices

Milk price analysis is important in informing investment decisions among the prospective investors/dairy farmers and to draw comparison with trading partner states. These prices are compiled and updated on monthly basis for the different milk sheds. During the year, the highest average retail and farm gate prices were recorded in the month of April i.e. Ugx.1873 and Ugx.1391 respectively, and the lowest prices were recorded in the month of July i.e. Ugx.1514 for retail and Ugx.984 for farm gate.

Figure 5: Annual National Raw Milk Prices at Farm gate and Retail- FY 2021/22

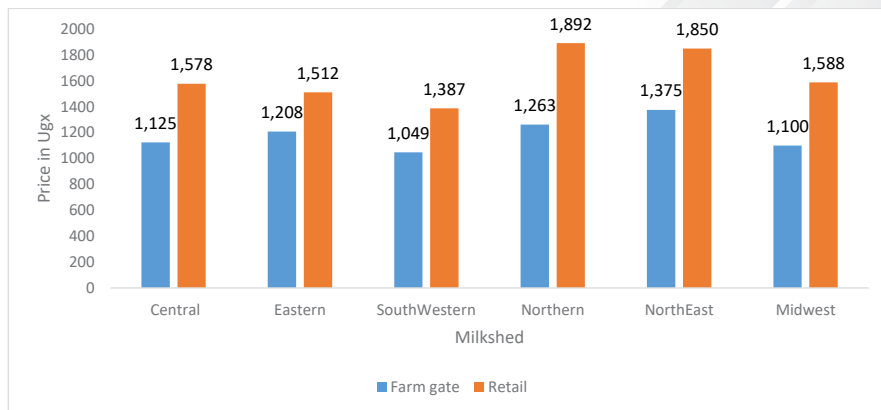

Source: DDA monthly price reports

### 6.3 Average Raw Milk Price comparison

The retail prices were highest in Northern milk shed followed by north Eastern and lowest in South western followed by Mid-west. For the farm gate prices, the highest was recorded in north eastern followed by northern and the lowest recorded in south western followed by Midwest.

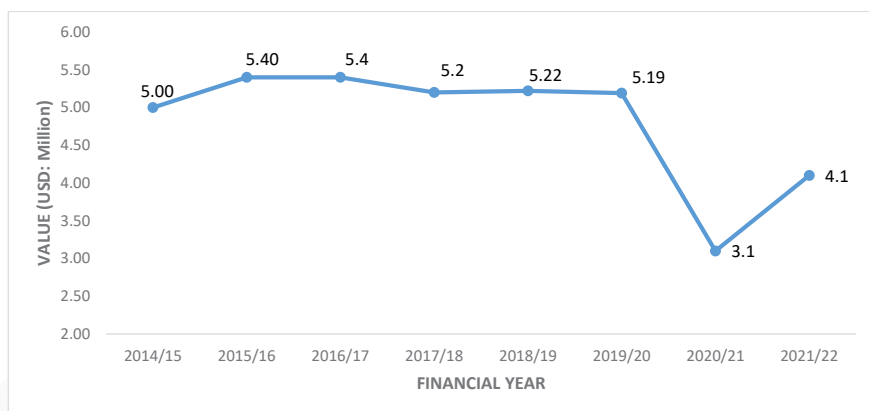

**Figure 6: Milk shed Raw Milk Prices**

#### 6.4 Trend of Dairy Imports (FY 2014/15-FY 2021/22)

The trend of dairy imports has been decreasing overtime with most dairy products being processed domestically replacing imports. However, the value of imports increased from USD 3.1 million to USD 4.1 million between 2020/21 and 2021/22 after a sharp drop from USD 5.19 million in 2019/20.

**Figure 7: Trend of Dairy Imports**

#### 6.4.1 Dairy imports

Uganda imported several dairy products from a total of 36 Countries across the globe.

The Importing countries and the products imported are shown in the table below;

**Table 15: Distribution of dairy imports**

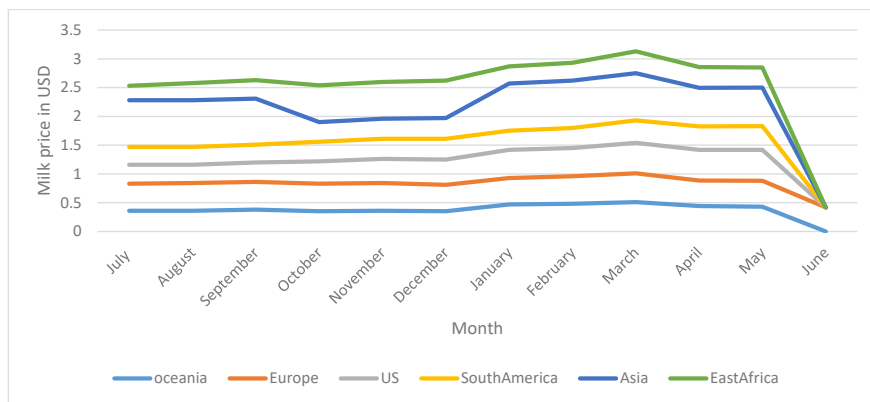

SN	Country Name	Value in Ugx	Products Imported.
1	Rwanda	8,846,943,172	Infant formula, Cheese
2	Kenya	3,995,227,680	Milk powder, Cheese, UHT, Yoghurt, butter
3	Netherlands	1,555,341,500	Milk powder, Cheese, Yoghurt, butter, UHT
4	Poland	1,118,993,650	Cheese, UHT, Infant formula
5	United Arab Emirates	838,168,489	Butter, Cheese, UHT, Milk powder, Infant formula
6	France	478,538,863	Cheese ,Butter, Milk powder, UHT
7	Zambia	386,537,941	Infant formula, Cheese
8	Mexico	341,303,786	Infant formula
9	Zimbabwe	334,760,275	Milk powder
10	Germany	334,020,546	Butter, Cheese, Milk powder, UHT

30	Swaziland	342,433	Milk powder
31	Somalia	321,268	Milk powder
32	Thailand	307,422	Butter, Milk powder
33	Singapore	283,945	Milk powder
34	Greece	174,991	Cheese
35	Sweden	145,568	Milk powder
36	Nigeria	115,447	Milk powder, Infant formula
	<b>Total</b>	<b>19,750,831,074</b>	

## 6.5. External Marketing

### 6.5.1. International Milk Prices by World Continents

The supply of milk affects the price of milk worldwide. This is evidenced by the fluctuating milk prices all over the world at different times of the year due to changes in milk production.

**Figure 8: Comparison of International Raw Milk Prices across the world**

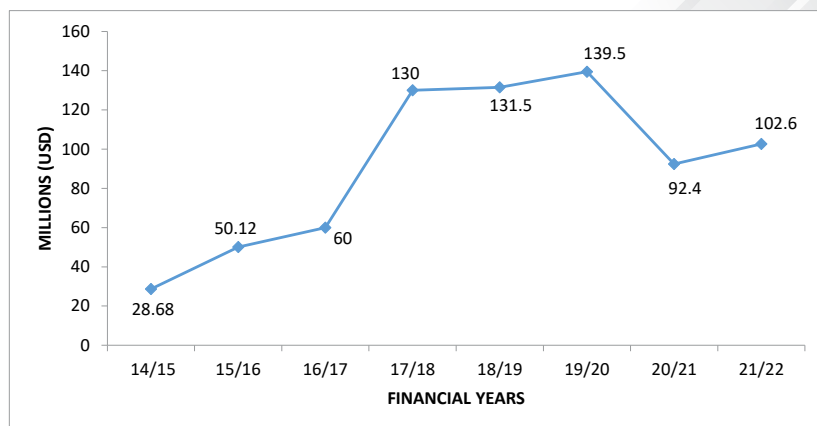

### 6.5.2 Distribution of Dairy exports by destination countries.

Country name	Value in Ugx	Products
Kenya	281,833,600,379	Milk powder,UHT,Butter
Egypt	36,607,423,594	Butter
South Sudan	29,900,321,762	Butter,Cheese,Milk powder,UHT,Yoghurt
United States	18,270,660,110	Acid casein
Tanzania	13,512,149,753	Butter,Milk powder,UHT
Ethiopia	5,431,275,655	Milk powder,Acid casein
Malawi	4,189,073,672	Milk powder,UHT,Butter
Oman	3,913,433,987	Milk powder,UHT,Butter
India	948,622,676	Butter
Japan	908,425,632	Butter
Zimbabwe	649,461,000	Milk powder
United Arab Emirates	549,999,060	Milk powder
Sudan	490,744,888	Milk powder,UHT
Democratic Republic of Congo	452,433,698	UHT,Milk powder
Somalia	305,016,192	Milk powder
Burundi	169,191,170	Milk powder,UHT
<b>Total</b>	<b>398,131,833,228</b>	

### 6.5.3 Trend of Dairy exports for the last 8 years (FY 2014/15-FY 2021/22)

Dairy exports have been increasing overtime except for FY 2020/21 which showed a drop due to the COVID-19 pandemic, however in the last financial year FY 2021/22 there was an increase compared to the previous year. This is represented on the graph below;

Figure 9: Trend of Dairy Exports in Uganda over the last eight years

Source: URA database

### 6.5.3 Border Dairy Consignment Inspections and Compliance

Inspection of consignment for both imports and exports is very important in ensuring that our exports meet the international standards and to ensure that what is imported meets the required quality standards to protect domestic consumers.

DDA has 4 border post offices manned by Dairy inspectors who carryout consignment inspections of dairy imports and exports. Below is a summary of the total number of consignments inspected at the different posts during the FY 2021/22.

Table 16: Distribution of Import and Export Consignments inspected by Border post

Border post	Number of consignments inspected
Mutukula Boarder	804
Malaba/Busia	883
Entebbe Airport	169
<b>Total</b>	<b>1,856</b>

Source: DDA Annual performance report

## CHAPTER SEVEN

### 7.0 Dairy Quality and Standards

Ensuring quality and safety of milk and milk products on the market is one of the top priorities of DDA during the implementation of its regulatory activities. Market surveillance, inspections and enforcement activities are all carried out to ensure quality and standards are adhered to.

#### 7.1 Milk Samples Tested

Milk and milk product samples are collected and tested by trained Laboratory technicians and inspectors. A total of 6,600 milk and milk product samples were analyzed in the FY 2021/22

**Table 17: Distribution of Dairy Product Samples analyzed by milk shed**

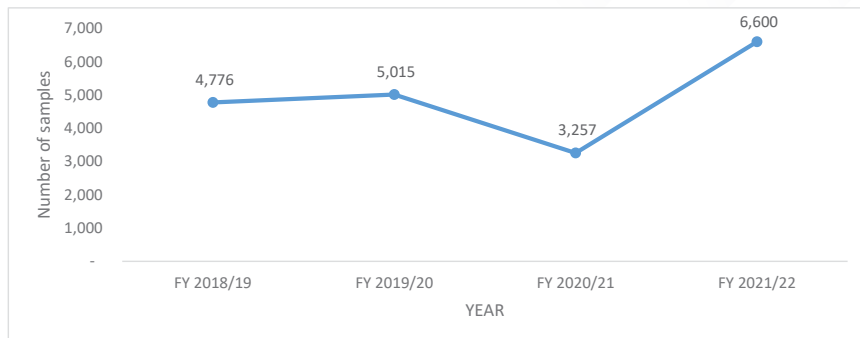

<b>MILK SHED</b>	<b>Milk Samples analyzed</b>
South Western	1,038
Northern	316
Eastern	435
Northeastern	508
Midwestern	1,141
Central	628
UG/KLA and Mutukula Boarder	23
NDAL	2,511
<b>TOTAL</b>	<b>6,600</b>

*Source: DDA Annual performance report 2021/22*

### 7.1.2 Milk and Milk product testing and analysis

Samples tested included raw milk, UHT, Pasteurized milk, Yoghurt, Milk powder, Ice cream, Butter, Ghee, and Infant Formula. The total number of samples tested and analyzed in FY 2021/22 increased by 100.2% as compared to FY 2020/21.

#### Trend of milk samples tested and analyzed for the last four years

### 7.2 Milk shed laboratories

The authority adopted the milk shed approach in implementation of its mandate and established six milk shed offices in the Country. The plan is to have all the six milk sheds with well-equipped dairy laboratories to be able to test milk samples. However, out of the six milk sheds, only four have operational dairy laboratories.

**Table 18: Distribution of Dairy laboratories by milk shed**

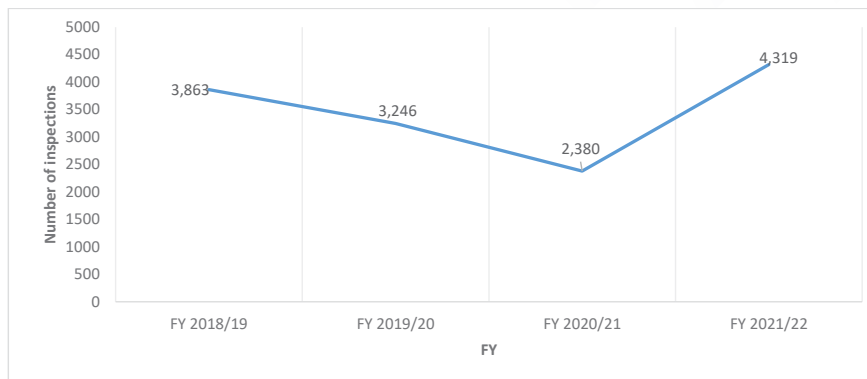

Milk shed.	Number of laboratories
Southwest	1
Central	1*
Eastern	0
Midwest	1
Northeastern	1
Northern	1
<b>Total</b>	<b>4</b>

Source: DDA annual report

### 7.3 Total Milk shed inspection of Milk handling premises carried out in FY 2021/22

During the FY 2021/22, a total of 4319 premises were inspected across the country. There was a significant increase compared to the last three financial years i.e. from 3863 in FY 2018/19 to 4319 premises in FY 2021/22.

**Figure 10: Trend of Milk handling premises inspections for the last four years**

Source: DDA Annual performance report 2021/22

### 7.4 Market Surveillance

#### Market Surveillance

Market Surveillance includes activities carried out and measures taken by the Authority to ensure that milk and milk products on the market comply with set dairy standards and regulations. A total of 49 market surveillance activities were carried out.

**Table 19: Market surveillance activities carried out in FY 2021/22 per milk shed**
